

Issues resolved

1. Error that could lead to a crash while news was receiving.
2. The **Collateral value** parameter was not calculated while the order entry dialog box for futures contracts was opening.
3. Incorrect price substitution when using the **Check orders prices** setting.
4. Autocompletion of boxes using the default_client_codes.ini settings file did not work in the order entry dialog box.
5. After restarting the QUIK Workstation, the linked-windows mode was disabled if the linked table was opened earlier than the main table.
6. Duplication of rows in the **Orders** table, which could occur if you had rights for the OMS Manager Module classes.
