

Changes in QUIK Workstation 8.3.1

Features of new version

1. The transmission of interest rates in a Level II Quotes with SWAP instruments was added.
2. New parameters were added to the **Table of cash liabilities and claims [Currency]**:
 - _ **Incoming execution**. It is net of **Incoming credit** and **Incoming debit**;
 - _ **Planned execution**. It is net of **Buy value** and **Sell value**.
3. Filtering IQS classes when calling the context menu from the **Client account positions** table.
4. New type of EES trades were supported in the Trades table:
 - _ 67 – Reverse EES trade;
 - _ 68 – Direct covered EES trade;
 - _ 69 – Direct uncovered EES trade;
 - _ 70 – Direct aggregated EES trade.
5. The behavior of the **Highlight key parameters** setting for order entry dialog box was changed. Now when the setting is selected, only text in price and quantity boxes is bolded. The text **Buy** and **Sell** on the operation selection buttons will always be displayed in plain text, while the background of the inactive button will be painted over with the corresponding color.
6. Changes in **General settings** dialog box:
 - _ Controls (status bar and scrollbars) were moved from the **Program/Toolbars** section to the **Program** section;
 - _ The **Sound off** menu item was moved from the **General settings** to the **Sounds** and renamed to **Silent mode**;
 - _ The **Numerical separators in text boxes** menu item was moved to the **Trading/Orders/Entry forms** tab;
 - _ The **Contextual Filter for list boxes** and **Context-based search in dropdown lists** menu items were removed. Now settings are unconditionally active;
 - _ Some of the menu items of **Program** menu were renamed.
